

Capability Statement

Maven Group was founded in 2021 as a boutique consultancy for water and environment related projects. The company was founded by Alain Ducheyne, bringing over 15 years of projects to the table. The Group is affiliated with 5 additional senior environmental consultants.

The Group's core capabilities relate to:

- **Project management**
The Group's consultants all field multiple years of managing multidisciplinary projects from industrial sites to projects spanning entire regions. All have completed PMP or PRINCE2 certification during their career.
- **Planning and execution of field operations**
The group has a wealth of experience in a range of terrestrial and near-shore environments, in arid, tropical, temperate and arctic climates.
- **Deployment and management of instruments and sensor networks**
Underpinning many environmental projects is the acquisition of good quality measurements to further other aspects of a project. The Group is capable of deploying a number of sensors used for the monitoring of common parameters affecting or affected by meteorology, water quality, (ground)water conditions.
- **Processing and analysis of environmental data**
Large datasets require processing and/or interpretation prior to be used to support project tasks and deliverables. Maven has a range of tools available for its processing and analysis, including but not limited to the use of:
 - Python scripts for cleaning and visualization of data
 - GIS for geographical data
 - SQL database structures
 - PHREEQC for (geo)hydrochemical modelling

General Company information:

Name	Maven Group
Entity type	BV (private limited)
Year incorporated	July 2021
Country of incorporation	Belgium
